Professional Summary

Software Developer specializing in TypeScript, React, and Next.js with 3 years of experience delivering production-grade web applications. Architected a 7-app platform with a centralized npm component library (560+ components, 55+ hooks) powering India's grassroots football ecosystem. Built real-time WebSocket systems, payment integrations, and cross-domain authentication at scale. Shipped open source contributions to decentralized protocol tooling used by the Web3 developer community.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), PHP, Java
Frontend: React 19, Next.js 15/16, HTML5, CSS3, Tailwind CSS 4, shadcn/ui, Radix UI, Framer Motion
State Management: Zustand, TanStack React Query v5, React Hook Form, Zod
Backend: Laravel, REST APIs, Strapi 5 CMS
Testing: Jest, Vitest, Property-based Testing (fast-check)
Web3: Blockchain integrations, DApp interfaces, Decentralized protocols (ATProto)
Databases: PostgreSQL, MySQL
Tools: Git, WebSockets, npm Publishing, tsup, Storybook, Razorpay, Stripe

Professional Experience

Club Duelz (Startup) *Ahmedabad*
Frontend Developer Lead & Co-Founder *Jan 2024 – Present*

- Architected 7 independent Next.js 16 applications (React 19, TypeScript 5) serving India's grassroots football community across auth, player, organization, admin, and marketing portals, with 560+ responsive components across 17+ OKLCH color schemes.
- Published `@duelz-labs/common`, a centralized npm library bundled with tsup (ESM+CJS), consolidating 56 React components, 28 API service modules, 55+ TanStack Query hooks, and 4 Zustand stores, eliminating code duplication across all 7 apps.
- Implemented cookie-based JWT authentication spanning all `.clubduelz.in` subdomains with AuthGuard route protection, Google OAuth, and OTP verification, securing all user sessions platform-wide.
- Built a real-time WebSocket live match scoring system with auto-reconnect and pitch visualization, enabling instant score updates and a dual-mode admin panel (Community vs Tournament).
- Integrated Razorpay payment gateway with QR ticket generation and Strapi 5 CMS for e-commerce APIs; designed a two-tier Zustand + TanStack Query state architecture reducing redundant API calls platform-wide.

Protocol Labs Dev Guild *Remote/Global*
Guild Member (Cohort 2 & 3) *Jan 2025 – Aug 2025*

- Shipped production features for the Storacha decentralized storage ecosystem spanning frontend React components, backend Node.js services, and Web3 protocol integrations; resolved critical HTTP error handling bugs improving API reliability across multiple repositories.
- Led documentation restructuring across ucanto's 15+ package monorepo and mentored peers in technical discussions across a 50+ member global developer community.

Concetto Labs *Ahmedabad*
Full Stack Developer *Jan 2025 – Sep 2025*

- Developed backend services in Laravel and PHP for a production-scale food delivery platform, optimizing API response times and database query performance.
- Implemented real-time WebSocket communication for live driver tracking and intelligent order assignment, reducing dispatch latency for end users.
- Integrated Stripe Connect payouts to automate driver earnings disbursement with PCI-compliant transaction handling across the payment pipeline.

Education

New L J Institute of Engineering and Technology *Nov 2021 – May 2025*
B.E. in Computer Science Engineering

- CGPA: 9.2 / 10.0

Projects

Club Duelz: Multi-App Platform Next.js 16, TypeScript, React 19, Zustand, TanStack Query, Tailwind CSS, shadcn/ui *[/live]*

- Full-stack platform spanning 7 apps, a centralized npm library, multi-format tournament brackets, live WebSocket scoring, Razorpay ticketing, DAU analytics, and ML-based NSFW detection; launched across subdomains of clubduelz.in.

Bluesky Backup Webapp (Storacha) *[/github]*

- Led full-stack development as core maintainer, shipping ATProto repository backup pipelines with automated scheduling and zero-data-loss reconnection flows across unstable network conditions.
- Collaborated with 10+ open source contributors to review PRs, resolve issues, and establish coding standards for the Web3 community project.

ATProto React Visualization Components *[/github]*

- Developed a type-safe React component library in TypeScript for visualizing ATProto/Bluesky data structures, bundled with Vite as composable, tree-shakeable modules for Web3 developers.
- Enforced strict ESLint rules and full TypeScript type coverage, ensuring API consistency and reducing integration errors for downstream consumers.

Core Contributions to Storacha Open Source Platform

- Introduced contextual job-level tracing in the Telegram Miniapp [tg-miniapp #219] and resolved RFC-compliant HTTP error handling gaps in the ucanto RPC framework [ucanto #375].
- Overhauled developer documentation for the ucanto RPC library spanning 15+ packages, accelerating contributor onboarding and establishing code review standards adopted by maintainers [ucanto #372].
